Carlos Lima

Back-End Developer

Summary

Back-end developer with 4 years of experience building web systems with PHP and Laravel for retail and logistics companies in Brazil.

Experience

Back-End Developer, Loja Rápida · Feb 2022 – Present

- Built the order management API used by 40 stores across the Northeast region.
- Reduced checkout errors by 25% by adding validation and automated tests to the payment flow.
- Migrated legacy reports from raw SQL to Laravel queues, cutting generation time from 10 minutes to 40 seconds.

Web Developer, LogTech · Jan 2020 – Jan 2022

- Developed a delivery tracking dashboard in Vue.js consumed by 300 drivers every day.
- Integrated three carrier APIs, removing manual tracking work for the support team.
- Maintained the MySQL database and wrote nightly backup scripts with Docker and cron.

Projects

- Created an open-source Laravel package for Brazilian address lookup with 1,200 downloads.
- Published a tutorial series on Laravel queues followed by 2,000 developers.
